

REMARKS/ARGUMENTS

Re-examination and favorable reconsideration in light of the above amendments and the following comments are respectfully requested.

In the office action mailed September 9, 2004, the Examiner required restriction between the following groups of inventions.

- I. Claims 1-6, 21, and 22, drawn to a brush seal, classified in class 416, subclass 173.3;
- II. Claims 7, 9-14, 23, and 24, drawn to a brush seal segment, classified in class 277, subclass 355; and
- III. Claims 15-20, drawn to a method of assembling a brush seal, classified in class 415, subclass 173.5.

By the present response, Applicant hereby elects the invention of Group II, claims 7, 9-14, 23, and 24 for the purposes of examination. This election is made with traverse with respect to the invention in Groups I and II.

With regard to Groups I and II, these two groups are not related in combination/subcombination. Independent claims 1 and 7 both recite the same three basic elements--a bristle arrangement and pair of plates. To further emphasize that the inventions are not related as combination/subcombination, the preamble of claims 1-6, 21 and 22 have been amended herein to recite a brush seal "segment" rather than a brush seal.

Applicant respectfully requests that an action be issued on claims 1-7, 9-14, and 21-24. Applicant hereby reserves the right to file a divisional application to non-elected claims 15-20.
